## Section 4: FIRST AID MEASURES

Description of First Aid measures:

**General Advice:** For advice contact the National Poisons Centre on 0800 POISON

(0800 764 766) or a doctor immediately. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to

mouth. Obtain medical attention.

If inhaled: Move the victim to fresh air.

If breathing is irregular or stopped, administer artificial respiration.

Keep patient warm and at rest.

Call a Doctor or the National Poisons Centre immediately.

**In case of skin contact:** Take off all contaminated clothing immediately.

Wash off immediately with plenty of water. If skin irritation persists, call a doctor. Wash contaminated clothing before re-use.

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at

least 15 minutes.

Remove contact lenses (if present). Immediate medical attention is required.

If swallowed: If swallowed seek medical advice immediately and show the container

or label.

DO NOT induce vomiting.

Important symptoms and effects, both acute and delayed:

**Symptoms:** No symptoms known or expected.

Indication of any immediate medical attention and special treatment needed:

There is no specific antidote available.

Treat symptomatically.

### **Section 5: FIRE-FIGHTING MEASURES**

Extinguishing media:

Suitable extinguishing media: Small fires:

Use water spray, alcohol-resistant foam, dry chemical or carbon

dioxide. Large Fires:

Alcohol resistant foam or water spray.

**Unsuitable extinguishing media:** Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture:

Specific hazards during fire-

fighting:

As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of

combustion (see section 10)

Exposure to decomposition products may be a hazard to health.

Advice for firefighters:

Special protective equipment for

firefighters:

**Hazchem Code:** 

Wear full protective clothing and self-contained breathing apparatus.

**Further information:** Do not allow run-off from fire fighting to enter drains or water courses.

Cool closed containers exposed to fire with water spray.

### **Section 6: ACCIDENTIAL RELEASE MEASURES**

#### Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in Sections 7 and 8.

**Environmental Precautions:** 

Do not flush into surface water or sanitary sewer system.

If the product contaminates rivers and lakes or drains inform respective

authorities.

Methods and material for containment and cleaning up:

Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal

according to local regulations (see section 13).

Do not create a powder cloud by using a brush or compressed air.

Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents.

Retain and dispose of contaminated wash water.

**Reference to other sections:** Refer to disposal considerations listed in Section 13.

Refer to protective measures listed in sections 7 and 8.

### **Section 7: HANDLING AND STORAGE**

Precautions for Safe handling:

Advice on safe handling: No special protective measures against fire required.

Avoid contact with skin and eyes. When using do not eat, drink or smoke. For personal protection see section 8.

Conditions for safe storage, including any incompatibilities:

Requirements for storage area

and containers:

No special storage conditions required. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.

Specific end use(s)

Specific use(s)

For proper and safe use of this product, please refer to the approval

conditions laid down on the product label.

### Section 8: EXPOSURE CONTROL / PERSONAL PROTECTION

#### **Control Parameters**

**Occupational Exposure Limits:** 

Occupational Exposure Limits.				
Components	CAS No	Value type (form of exposure)	Control parameters	Basis
chlorantraniliprole	500008-45-7	TWA	10 mg/m³ (total dust)	Supplier
			5 mg/m³ (respirable dust)	Supplier
			5 mg/m <sup>3</sup>	Syngenta

Exposure controls

Engineering measures: THE FOLLOWING RECOMMENDATIONS FOR EXPOSURE

CONTROLS/PERSONAL PROTECTION ARE INTENDED FOR THE MANUFACTURE, FORMULATION AND PACKAGING OF THE PRODUCT. FOR COMMERCIAL APPLICATIONS AND/OR ON-FARM

APPLICATIONS CONSULT THE PRODUCT LABEL.

Containment and/or segregation is the most reliable technical

protection measure if exposure cannot be eliminated.

The extent of these protection measures depends on the actual risks in

use.

If airborne mists or vapours are generated, use local exhaust

ventilation controls.

Assess exposure and use any additional measures to keep airborne

levels below any relevant exposure limit.

Where necessary, seek additional occupational hygiene advice.

Personal Protective Protection:

**Eye protection:** No special protective equipment required.

**Hand protection:** No special protective equipment required.

**Skin and body protection:** No special protective equipment required.

Select skin and body protection based on the physical job

requirements.

**Respiratory protection:** No personal respiratory protective equipment normally required.

When workers are facing concentrations above the exposure limit they

must use appropriate certified respirators.

Suitable respiratory equipment: Respirator with a particle filter

The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/ particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.

Filter type: Particulates type (P)

**Protective measures:** The use of technical measures should always have priority over the

use of personal protective equipment.

When selecting personal protective equipment, seek appropriate

professional advice.

Personal protective equipment should be certified to appropriate

standards.
